Panasonic ideas for life

Intelligent, Versatile Communications Solutions

These days, if your company wants to stay competitive it needs technology and equipment to help it adapt to new business realities. The KX-TDA50/100/200 are true converged communications systems, designed with incredibly versatile ways for you to structure your company's communications network. You can build a quick, efficient, decentralized organization under an easy-to-maintain centralized hub.

State-of-the-art wireless capability is designed into the KX-TDA systems, so it's easy to stay in touch with employees that are constantly on the move or away from their desks. For businesses with multiple locations our system can be networked together using advanced IP technology, ISDN, or basic T1 services. The KX-TDA systems support centralized voice mail, which services all locations within the extended voice mail network, and Network BLF, which allows you to view the status of extensions in other locations.

The KX-TDA50/100/200 are powerful and versatile communication systems that will easily adapt to any business, providing solutions that will improve the way your business communicates.

Grows with You

The KX-TDA50/100/200's modular design lets you expand the system as your needs evolve. It's easy to expand the KX-TDA systems because of the system's free slot architecture. You can insert expansion cards and access new features as well as expand your capabilities. This expandability means you can enhance system capabilities and features to meet your changing needs, without having to purchase a new system.

| Maximum System Capacities*				
	Maximum Number of Ports	Maximum Number of CO's	Maximum # of KX-T7600 Series Proprietary Wired Telephones	Maximum Number of Wireless Telephones
KX-TDA50	24	12	24/48 DXDP	28
KX-TDA100	96	64	64/128 DXDP	128
KX-TDA200	192	128	128/256 DXDP	128

*System capacities will vary depending on the type of interface that is used to connect to the system.

Freedom, with Great Clarity

Panasonic proprietary multi-line wireless phones let you take the benefits of your phone system with you anywhere on your premises. Now, Panasonic has taken it a step further with our latest line of DECT 6.0 wireless phones which offer the reduced interference, clarity and security of DECT 6.0 Technology. By employing up to 4 strategically-placed cell stations, you can move throughout your warehouse, plant, showroom or anywhere on site, confident you won't miss an important customer call because you're away from your desk.

KX-TD7685

Feature-Rich, Attractive and Easy to Use

Panasonic has phones perfect for your budget and needs. No matter which phone you choose, each is equipped with the standard features that will help you achieve new levels of communication ease. For greater convenience, choose from our line of high-end phones equipped with large LCD displays with soft key functionality.

System Telephones

Manage change at your own pace. No matter what your deployment strategy is, traditional, IP or both, the KX-TDE can be configured to meet your needs today and well into the future. If you are not ready to deploy voice over your network, our line of KX-T7600 series traditional system telephones is a fully-featured alternative to the KX-TDE.

- Programmable Keys with Red/Green LED
- Easy-to-Read Back-lit Display
- Time-Saving, Easy-to-Use Navigator Keys
- Ergonomically-Designed, Tilt-Angle Adjustment
- Headset Jack for Hands-Free Convenience
- Digital Duplex Speakerphone

KX-T7636 with KX-T7603
- 6-Line Back-lit Display
- 24 Programmable CO Keys
- Digital Speakerphone
- Compatible with Optional 12 CO Keys and USB Port
- eXtra Device Port (XDP) and DXDP
- KX-T7603 12-button Add on-Module

KX-T7633
- 3-Line Back-lit LCD Display
- 24 Programmable CO Keys

- 60 Direct Stations Selection (DSS) Keys

KX-T7667
- 1-Line Back-lit LCD Display
- 12 Programmable CO Keys
- Message/Ringer Lamp
- Digital Speakerphone
- DXDP

IP Telephones

The Panasonic IP telephony solution integrates your remote employees and locations by giving them easy access to your corporation's central communication hub, letting them enjoy the feature-rich capabilities of the KX-TDE Converged IP PBX.

Bluetooth® Headset Compatible

Mounting the optional KX-NT307 Bluetooth® module lets you connect a commercially available Bluetooth headset for hands free voice communications. You can also answer and end calls using a compatible Bluetooth headset.

Peer-to-Peer Communications

Simply connect the KX-TDE100 or KX-TDE200 for automatic Peer-to-Peer configuration. Once an IP to IP call is established, the call reverts to a peer-to-peer connection freeing up system recourses. In addition, this makes moving an IP telephone from one office to another within the same network a plug and play operation.

KX-TDA0350
VoIP Softphone
- Allows a PC to Operate as a system telephone
- Emulates a KX-NT136 Telephone
- 24 Programmable CO Keys with Dual Color Indicators
- 6-Line Alphanumeric Display with Interactive Soft Keys
- Easy-to-Use Keyboard or Mouse Operation
- Message Waiting Indicator for VM
- Network Connection Indicator

Improved Voice Quality G.722 Protocol

A Peer-to-Peer connection established between any one of the KX-NT300 series telephones uses a G.722 protocol, one of the highest quality standards for IP voice communications.

Double Tilt Design

The double tilt design lets you adjust the base unit and LCD angles to match the height of a desk, table or any location the phone is placed. The base unit can be adjusted in eight steps and the LCD moves separately to optimize your viewing angle.

Second Ethernet Port

All of the KX-NT300 series telephones are equipped with a second Ethernet port. This reduces cable clutter on your desk and eliminates cost for cabling or additional equipment required to install a second Ethernet port.

24-Character LCD

- Headset Jack

Excellent Reliability and Maintenance

The KX-TDA systems are assured by rigorous quality control and extensive testing before they leave the factory, and comes with a 2-year warranty. The systems are also designed for quick, easy maintenance, keeping downtime to an absolute minimum so your company can operate with as little disruption as possible. You can also change or upgrade modules without switching off the system. The KX-TDA50/100/200 are RoHS compliant, meeting the international standard for the restriction of the use of certain hazardous substances in electronic equipment, ensuring your system will meet the international environmental standard that's becoming increasingly important.

Programming & Maintenance

Panasonic certified technicians use a Windows®-based programming tool with multiple password-protected access points to program the system and perform maintenance. The system can also be accessed remotely via an optional dial-up modem or through the Internet.

Secure Digital (SD) Card

Even if your system suffers a catastrophic failure, all of your system information is saved and can be reloaded easily with our Secure Digital (SD) card. In addition, the SD card makes it simple to upgrade the system with new features.

Microsoft® and Outlook® are registered trademarks of Microsoft Corporation.

Intelligent Call Management

For businesses with high-volume customer call traffic, keeping calls flowing smoothly and quickly is essential. Panasonic KX-T7636, and KX-T7633 digital telephones equipped with a USB module do their part by connecting to a personal computer via USB, allowing telephone systems and computer systems to share the workload. For example: the add-in USB toolbar for Microsoft Outlook® allows you to use your Outlook contact list to make calls. You can also create your own pop-up call notification for incoming calls based on caller ID* from your Microsoft Outlook contact list. This Computer Telephony Integration (CTI) helps enhance both efficiency and customer satisfaction, because employees can handle calls quickly and more appropriately for each occasion.

*requires fee-based phone company service
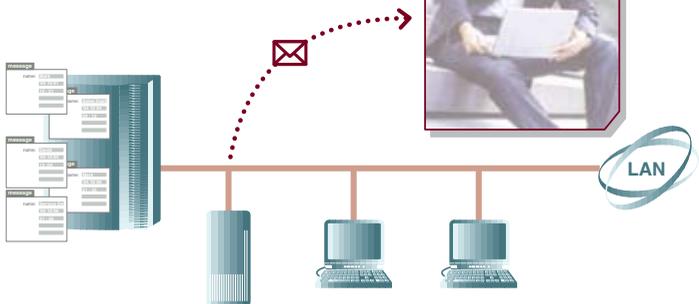

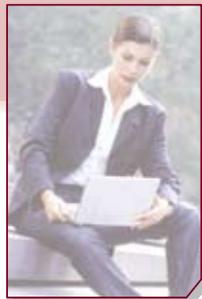

Integrated Solutions

The KX-TDA50/100/200 systems are truly integrated, connecting your dispersed, off-location offices and employees, while giving you full access to the system's incredibly rich and varied features. Your employees can use the latest in communication technology, and you can manage and maintain your network to your exact specifications.

Panasonic integrated solutions provide a wide variety of options that allow you to design a system that will meet your current and future business requirements—saving you time and money, and maintaining employee and customer satisfaction.

Integrated Messaging Solutions

Get an edge in handling your customers' calls with integrated messaging solutions, which automate your message delivery so your customers can get the quick and easy support they deserve. You also benefit from a system that takes messages automatically and keeps you in touch 24 hours a day. And of course, you'll love the cost savings. Panasonic messaging solutions mean convenience for you and satisfaction for your customers.

Email Integration and Voice Mail with Auto Attendant

e-message

By adding a KX-TVA series voice processing system, your calls can be easily managed by using the built-in automated attendant service, voice mail with email integration, and more. And with the high level of integration between the KX-TVA and the KX-TDA, you can enjoy features like voice mail LCD menus that allow you to access and manage your voice mailbox using the LCD display and soft keys. With all these choices, it's easy to custom design a system that's right for you.
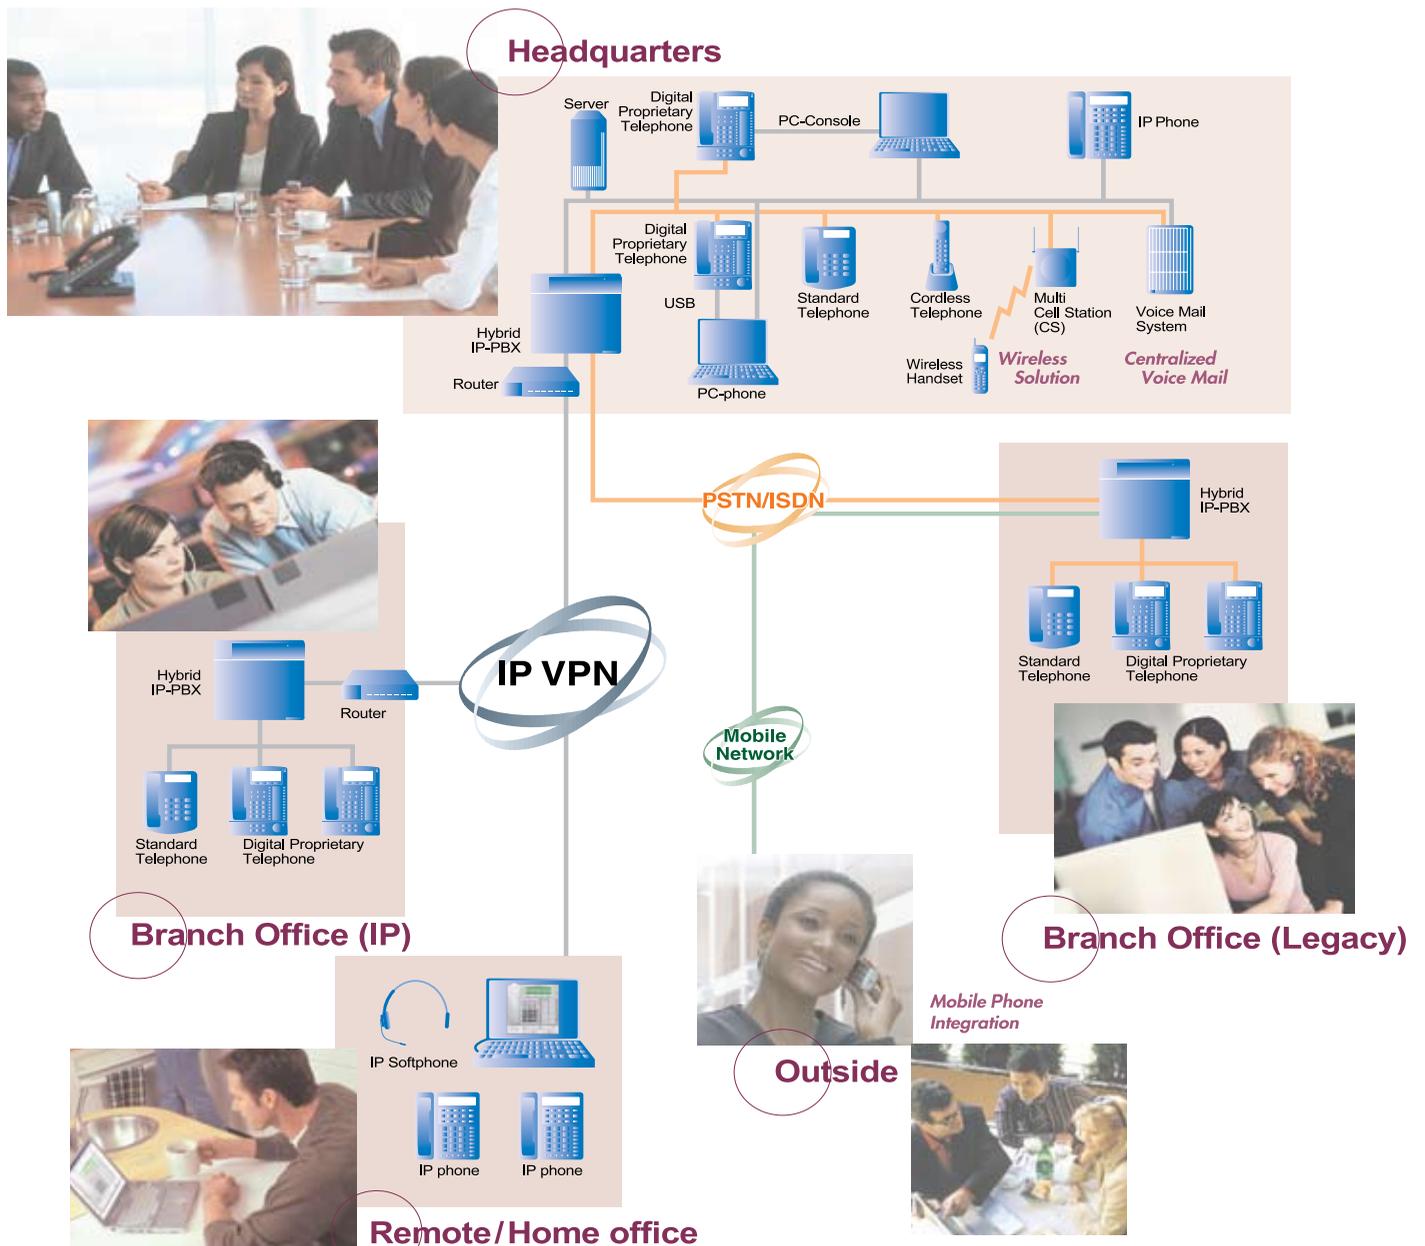

KX-TVA200

- 4 to 24 Ports and 1024 Mailboxes
- 1000-Hour System Recording Time
- E-message
- Telephone LCD Voice Mail Menu
- Customer Service
- Live Call Screening (LCS)
- Two-Way Recording
- Two-Way Transfer

Networking Solutions

Flexible networking solutions let you build your company's office and employee structure for the 21st century: employees can telecommute and satellite offices can be brought under a single, easily-managed network. They're designed to help your business benefit from cost savings and infrastructure improvements of VoIP technology. By combining rich voice communications with enterprise data networks and applications, Panasonic helps you accomplish your most important business objective - delivering lower costs and enhanced value from your network infrastructure investment.

VoIP is the latest proven technology for voice communications in which packets of digitally compressed voice are sent over data networks, and then are converted back to voice once it reaches its destination. By leveraging existing data networks, VoIP can bypass PSTN and therefore help avoid costs associated with PSTN calls no matter how far the distance and how long the conversation. VoIP is an ideal solution for site-to-site communications between multi-site offices - as well as for networking branch office and remote employees, small office/home office (SOHO) workers, and home sales personnel. This allows for a flexible working environment and lower costs.

Call Center Solutions

Your phone calls can be distributed and organized according to purpose and priority, making your call center more efficient while treating your customers right. You can tailor-fit your network to your exact needs with the KX-TDA's powerful and precise data and information reports on all aspects of your telephony system. Calls can be queued while your team is busy with other calls, and music or prerecorded promotional messages can be played for waiting callers to help reduce lost calls and missed business opportunities.

You can also assign an additional backup destination for calls that are not answered within a specific period of time. Preferred customers and VIPs can even have their calls connected with priority or to a specific staff member, allowing you to provide special attention to special clients.

Choose the Network Medium That's Right For You

The KX-TDA lets you choose the communication medium that works best for your business. VoIP allows your business to connect over your existing broadband network, and ISDN* transmits digital voice data over your existing telephone wires. Both feature QSIG, a high-level protocol for system-to-system communications, allowing your network to operate as if it were a single, cohesive unit. For the simplest option, use a T1* network, connecting you from Point A to Point B over a crystal clear voice channel.

Centralized Voice Mail and Network BLF

For businesses with multiple locations, our systems can be networked together using advanced IP technology or ISDN*. The KX-TDA supports centralized voice mail, which services all phones within the network with features like Network BLF, which allows you to view the status of extensions in other locations.

Wireless Station Roaming

Within a network, one wireless phone can be registered to a maximum of 4 KX-TDA systems. This allows a wireless station user to go to other offices and receive calls directed to them on their wireless station. This is accomplished by entering the remote nodes extension information into one TDA location so calls directed to it at one location can be handled at any location transparently.

ISDN and T1 not supported in the KX-TDA50.

UCD (Unified Call Distribution)

The KX-TDA50/100/200 can be programmed to handle incoming calls so they get to the correct department or individual without any disruption to the caller. Calls can be directed to a specific individual, group, live or auto attendant, voice mail, or any combination of the above.

KX-NCV200 ACD Report Server

The NCV200 ACD report server brings call center functions to your KX-TDA50/100/200, providing you with monitoring and performance reports, call information history, and agent log-in. It's easy to optimize call center management with NCV200's readable and comprehensive performance reports, which can be reproduced in emails or color graphs.
